

MESSAGE FROM THE PRESIDENT

Amy Campero

GREETINGS CREW IOWA!

It is a privilege to serve as your 2020 CREW Iowa President. I am excited and grateful to work alongside an amazing team of board members whose goals are to cement CREW as the premier network of commercial real estate professionals in Iowa. We have come a long way in a few short years and I'm excited to see where the future leads for our group.

I still remember the day a certain past president invited me to "drink the Kool-Aid".....at first I thought she was joking, but after having the opportunity to attend convention and meet other amazing members both near and far.....I was hooked on CREW! For those new to our group, my advice to you is GET INVOLVED!!!

I started on the communication committee as just a member, became co-chair of the communications committee the next two years, moved on to co-chair our CREW Connections committee, served as your president elect last year and now am president. And I'm so glad I had someone there holding the door and pushing me through it (literally) to get involved.

The connections and friendships I have made are invaluable.

You might have already noticed that CREW Iowa has updated its logo and its mission and vision statements. I'm excited to start the year 2020 with a fresh page in our history. I think the logo helps unify our chapter with our global organization, CREW Network. In our strategic planning session last fall, we revised our mission and vision statements to better exemplify what we all hope to achieve - to advance women to transform the commercial real estate industry.

I'm always available to answer any questions you may have on how you can become more involved – if you have interest in a certain committee or would like to start volunteering at an event, join our mentoring group or just find someone to connect with, please reach out. I am thrilled with the progress we have made in our chapter and look forward to continued growth with all of you.

Good luck to all of you in 2020 and happy networking!
